## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group I, Claims 1-7 in the reply filed on March 14, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kalloo et al. (US 2001/0049497).

Regarding claims 1-7, Kalloo discloses a method for ligation of a fallopian tube of a human patient comprising using an endoscope to orally access a gastric wall of a patient (Figure 6) advancing the endoscope into the peritoneal cavity through the puncture (Paragraph 6), locating and ligating the fallopian tube (Paragraph 49), removing the endoscope, and sealing the puncture (Figures 13-17). The gastric wall is punctured with a cutter coupled to a dilating balloon, wherein the balloon is inflated to
